Personal Profile

A proactive and organized front end developer with a passion for learning and innovation. I build responsive, user-focused interfaces and turn designs into clean, efficient code. With hands-on UI/UX experience in wireframing, prototyping, and user-centered design, I bridge the gap between design and development. A strong communicator and problem solver, I thrive as a team player in dynamic, creative environments

Education

Emobilis Mobile Technology Training Institute
Certificate in Web Development (2023)

Jomo Kenyatta University of Agriculture and Technology
Diploma in Business Information Technology (2021–2022)

Rift Valley Institute of Science & Technology
Craft Certificate in Information Communication Technology (2017–2019)

Terige High School
Kenya Certificate of Secondary Education (2013–2016)

Professional Experience

Fidelity Connect Limited

IT & Web Designer *(Jan 2026 – Present)*

- Design, build, and maintain the company website, ensuring functionality, security, and optimal user experience.
- Apply UI/UX design principles to create clean, intuitive, and responsive web layouts.
- Provide ICT support including hardware, software, and network troubleshooting.
- Support SEO efforts and website content management to improve online visibility.
- Maintain visual and brand consistency across all web pages and screen sizes.
- Identify process improvements and support the implementation of efficient digital workflows.

Dukapaq

Lead UI/UX Designer & Junior Software Developer *(Sep 2023 – Oct 2025)*

- Led UI/UX design for the company, setting design direction and standards across projects.
- Designed wireframes, mockups, and interactive prototypes in Figma for web and mobile interfaces.
- Conducted user research and usability testing to inform design decisions and improve user experience.
- Built and maintained a consistent design system and UI component library to speed up development.
- Translated user needs and business requirements into intuitive, accessible interface designs.
- Developed and maintained web applications using Django for backend and Vue/React for frontend.
- Collaborated with team members to design and implement new features.
- Wrote clean, maintainable, and efficient code.
- Participated in code reviews and provided constructive feedback.
- Troubleshot, debugged, and resolved issues reported by users.
- Stayed up-to-date with emerging technologies and best practices in web development.

Postal Corporation of Kenya

ICT Attache *(Sep 2018 – Nov 2018)*

- Provided support for daily corporate ICT operations, including hardware and software troubleshooting.
- Conducted maintenance, repair, and installations of computer systems and networks.

- Supported PABX telephone systems, structured cabling, and configuration.

Selected Projects

Loyalty App — *UI/UX Design, 2023*

- Designed a mobile-first loyalty program app with gamification and personalized rewards, integrated with existing POS systems.
- Delivered a 35% increase in customer engagement, 28% boost in repeat purchases, and 15% improvement in customer lifetime value.

Mobile POS App — *UI/UX Design, 2024*

- Led user research, wireframing, and prototyping for a mobile point-of-sale app with one-touch checkout, real-time inventory, and multi-payment support.
- Reduced transaction time by 40% and achieved a 95% customer satisfaction rate.

AgriConnect Mobile App — *UI/UX Design, 2025*

- Connecting seed companies, agro dealers, village-based advisors, and farmers in one unified app.

Agiza-Pro Ecommerce App — *UI/UX Design, 2025*

- Designed an end-to-end mobile e-commerce experience covering product discovery, checkout, order tracking, and a merchant dashboard.
- Improved checkout conversion by 35% and reduced cart abandonment by 40%.

Global South Climate Initiative Website — *Web Development, 2023*

- Designed and built a responsive, user-centered organisation website to support a digital marketing campaign, with SEO best practices integrated throughout.
